

Pre-Order Form & Advance Payment Module

1. Pre-Order Form-এর উদ্দেশ্য

Customer নিজে একটি Online Pre-Order Form পূরণ করবে এবং Product-এর প্রয়োজনীয় তথ্য দেবে।

Customer Form Submit করার পর তাকে **Advance Payment** করতে হবে।

গুরুত্বপূর্ণ **Business Rule**

Form Submit → Advance Payment → Payment Verification → Order Confirmed

Payment সফল না হলে Order কখনো **Confirmed** হবে না।

2. Customer Pre-Order Form

Customer একটি Public URL-এর মাধ্যমে Pre-Order Form-এ প্রবেশ করবে।

Step 1 — Product Information

- Product Name
- Product Image
- Product URL
- Product Website
- Product Category
- Product Variant
- Size
- Color
- Quantity
- Product Reference / SKU
- Customer Expected Price
- Product Remarks

Product URL

Customer যদি কোনো Website থেকে Product দিতে চায়, তাহলে:

Product URL Paste

করতে পারবে।

উদাহরণ:

```
https://example.com/product/123
```

Product Image Upload করার Option-ও থাকবে।

Product Image

Customer:

- 1 বা একাধিক Product Image
- Screenshot
- Product Reference Image

Upload করতে পারবে।

3. Customer Information

Required Fields

- Customer Name *
- Mobile Number *
- Email
- Delivery Address *
- District
- Area
- Post Code
- Alternative Mobile
- Customer Note

Delivery Information

- Delivery Address
 - Preferred Delivery Method
 - Special Delivery Note
-

4. Multiple Product Support

একটি Pre-Order Form-এ Customer একাধিক Product দিতে পারবে।

Example

Product 01

- Nike Shoe
- Size 42
- Quantity 1

Product 02

- Adidas Bag
- Black
- Quantity 2

Button

+ Add Another Product

এতে নতুন Product Section তৈরি হবে।

5. Product Destination / Country

Customer Product কোন Country থেকে আনতে চায় সেটি Select করতে পারবে।

Country

-  India
-  Dubai
-  Thailand

অথবা Admin চাইলে Country নিজে নির্ধারণ করতে পারবে।

Recommended

Customer Country Select করলে সেই Country-এর Available Product/Agent অনুযায়ী Order Routing করা যাবে।

6. Estimated Price

যদি Website/Product URL থেকে Product Price পাওয়া যায়, তাহলে Admin পরে Purchase Price Update করতে পারবে।

Pre-Order Form-এ:

Estimated Product Price

দেখানো যেতে পারে।

উদাহরণ:

Estimated Product Price: ₳8,000

Advance Required: ₳2,000

7. Advance Payment

Order Confirm করার আগে Customer-কে Advance Payment করতে হবে।

Payment Summary

Product Estimated Price: ₳8,000

Delivery Charge: ₳200

Total Estimated: ₳8,200

Advance Payment Required: ₳2,000

Pay ₳2,000 & Confirm Order

8. Online Payment Gateway

Customer সরাসরি Online Payment করতে পারবে।

প্রাথমিকভাবে Payment Gateway Integration রাখা হবে।

Possible Payment Methods:

- bKash
- Nagad
- Card
- Mobile Banking
- Internet Banking
- Other Supported Gateway

Developer Payment Gateway এমনভাবে তৈরি করবে যাতে ভবিষ্যতে Gateway পরিবর্তন/যোগ করা যায়।

9. Payment Flow

Customer Side

1. Fill Pre-Order Form

↓

2. Review Order

↓

3. Advance Payment

↓

4. Payment Gateway

↓

5. Payment Success

6. Order Confirmed

7. Order Confirmation Page

8. SMS / Email / WhatsApp Notification

10. Payment Failed হলে

যদি Payment Failed হয়:

Order Status:

Payment Pending

Customer-কে দেখাবে:

Your order has not been confirmed yet. Please complete the advance payment to confirm your order.

Button:

Retry Payment

11. Payment Successful হলে

Payment Gateway থেকে সফল Response পাওয়ার পর System Automatically:

Create করবে:

- Order ID
- Payment ID
- Transaction ID
- Payment Amount
- Payment Method
- Payment Date & Time
- Gateway Reference
- Payment Status

Order Status

Payment Pending → Confirmed

হবে।

12. Order ID

Payment সফল হওয়ার আগে Temporary Reference থাকবে।

Payment সফল হলে Final Order ID তৈরি হবে।

Example:

PRE-2026-000125

অথবা

ORD-2026-00125

Customer Confirmation Page:

Order Confirmed

Order ID: ORD-2026-00125

Advance Payment: ₹2,000

Payment Status: **Paid**

13. Customer Confirmation Page

Payment সফল হলে Customer একটি সুন্দর Confirmation Screen দেখবে।

Example

 **Pre-Order Confirmed**

Thank you for your order.

Order ID: ORD-2026-00125

Product: Nike Air Max 270

Quantity: 1

Country: India

Advance Paid: ৳2,000

Payment Status: Paid

We will purchase your product from the selected country and update you when your product is purchased.

Buttons:

View Order

Download Invoice

14. Customer Order Tracking

Customer Order ID + Mobile Number দিয়ে Order Track করতে পারবে।

Timeline

Order Submitted ✓

Advance Payment Received ✓

Order Confirmed ✓

Agent Assigned

Product Purchased

At Delivery House

Shipped to Bangladesh

Bangladesh Received

Ready for Delivery

Delivered

15. Admin Side — New Pre-Orders

Admin Dashboard-এ আলাদা Alert থাকবে:

New Pre-Orders

Payment Confirmed

Order ID	Customer	Product	Country	Advance	Status
ORD-00125	Rahim	Nike Shoe	India	₹2,000	Confirmed
ORD-00126	Karim	iPhone	Dubai	₹20,000	Confirmed

Admin এখান থেকে:

View → Assign Agent → Purchase

করতে পারবে।

16. Agent Assignment

Confirmed Order-এর পর Admin Agent Assign করবে।

Fields

- Order ID
- Country
- Agent
- Purchase Deadline
- Priority
- Admin Note

Example:

Order: ORD-00125

Country: India

Agent: Rahul Sharma

Purchase Deadline: 02 Sep 2026

17. Advance Payment Ledger

Customer-এর Advance Payment আলাদাভাবে Financial Transaction হিসেবে সংরক্ষণ করতে হবে।

Payment Record

- Payment ID
- Order ID
- Customer
- Amount
- Payment Method
- Gateway

- Transaction ID
 - Payment Date
 - Payment Status
 - Refund Status
 - Gateway Response
-

18. Advance Payment এবং Final Cost

Pre-Order-এর সময় Customer যে Advance দিয়েছে সেটি **Agent Balance**-এর সাথে মিশবে না।

দুইটি আলাদা Financial Concept রাখতে হবে:

Customer Payment

Customer → Business

Agent Payment

Business → Agent

এগুলো আলাদা Ledger হিসেবে Track করতে হবে।

19. Final Product Cost

Agent Product কেনার পর Actual Cost পাওয়া যাবে।

Example:

Customer Advance = ₳2,000

Agent Purchase Cost = ₳6,500

Shipping/Other Cost = ₳500

Total Business Cost = ₳7,000

Customer-এর Final Selling Price = ₳8,500

Advance = ₳2,000

Remaining Customer Payment:

₳8,500 - ₳2,000 = ₳6,500

System Automatically হিসাব করবে।

20. Price Difference Handling

Pre-Order-এর সময় Product-এর Price সবসময় Final নাও হতে পারে।

তাই:

Estimated Price

এবং

Final Price

আলাদা রাখতে হবে।

Example:

Estimated Price: ₳8,000

Actual Purchase Price: ₳8,700

System Admin-কে Alert করবে:

⚠ Price Changed

Customer-এর কাছ থেকে অতিরিক্ত Payment প্রয়োজন হলে:

Additional Payment Required: ₳700

Payment Link Generate করা যাবে।

21. Additional Payment

Customer চাইলে পরবর্তীতে Remaining/Additional Payment Online করতে পারবে।

Payment Types

- Advance Payment
- Additional Payment
- Full Payment
- Delivery Payment
- Refund

প্রতিটি Payment আলাদা Transaction হিসেবে থাকবে।

22. Refund System

Order Cancel হলে Advance Refund প্রয়োজন হতে পারে।

Refund Fields

- Refund ID
- Order ID
- Customer
- Original Payment
- Refund Amount
- Refund Method
- Refund Date
- Refund Reason
- Approved By
- Transaction Reference
- Status

Status

Pending

→ Approved

→ Processing

→ Refunded

23. Order Status vs Payment Status

দুটিকে আলাদা রাখতে হবে।

Order Status

- Draft
- Submitted
- Payment Pending
- Confirmed
- Agent Assigned
- Purchased
- At Delivery House
- Shipped
- In Transit
- Bangladesh Received
- Ready for Delivery
- Delivered
- Cancelled

Payment Status

- Unpaid

- Pending
- Paid
- Partially Paid
- Fully Paid
- Failed
- Refunded
- Partially Refunded

এতে Business Logic অনেক পরীক্ষার থাকবে।

24. Pre-Order Form UX

Customer-এর জন্য Form যতটা সম্ভব সহজ রাখতে হবে।

Recommended 4-Step Form

Step 01 — Product

Product Image / URL / Name / Variant / Quantity

↓

Step 02 — Customer

Name / Mobile / Address

↓

Step 03 — Review

Product + Price + Advance Amount

↓

Step 04 — Payment

Online Payment

↓

Success

Order Confirmed

25. Important Validation

Form Submit করার আগে:

- Product Name Required
- Product Image অথবা Product URL Required
- Quantity Required
- Customer Name Required
- Mobile Required
- Address Required
- Country Required
- Advance Amount Valid
- Terms & Conditions Accepted

Payment সফল না হলে Final Order Create/Confirm করা যাবে না।

26. Admin Order Detail

Admin Order খুললে একসাথে দেখতে পারবে:

Customer

Name
Mobile
Address

Product

Image
URL
Quantity
Variant

Payment

Advance
Additional Payment
Total Paid
Due

Agent

Country
Agent
Purchase Cost

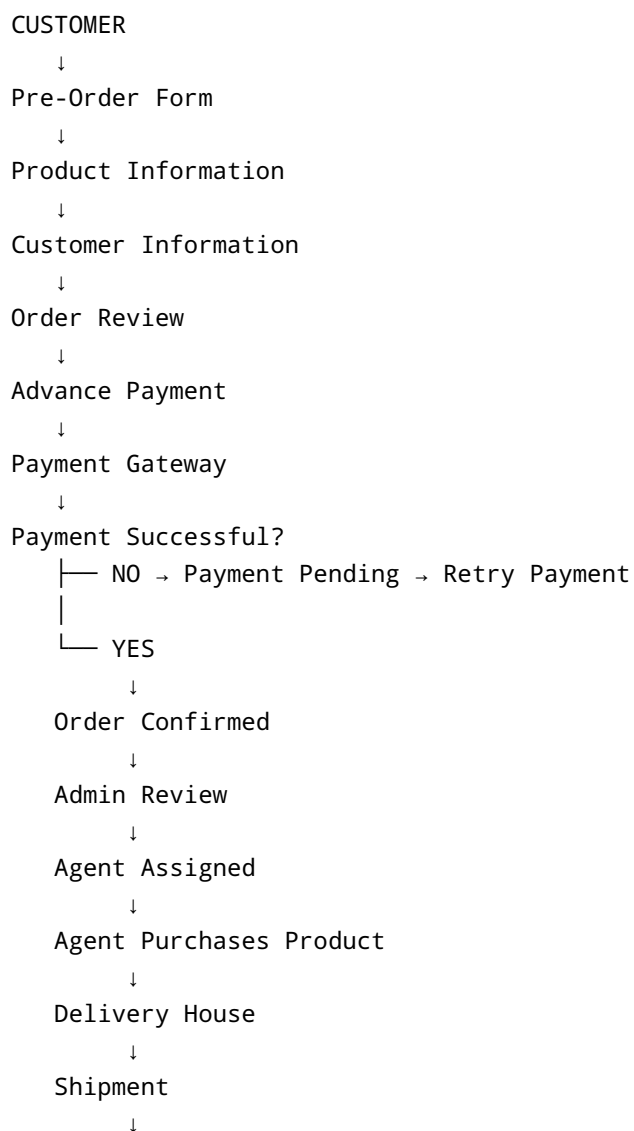

Logistics

Delivery House
Shipment
Tracking
Bangladesh Warehouse

Profit

Selling Price
Purchase Cost
Shipping Cost
Expense
Profit

27. Complete Pre-Order Workflow

Bangladesh Warehouse

Final Payment / Due Collection

Customer Delivery

Order Completed

28. Developer-এর জন্য Critical Rules

Rule A

Advance Payment ছাড়া **Order Confirmed** হবে না।

Rule B

Payment Gateway-এর **Server-side/Webhook verification** ব্যবহার করতে হবে। শুধু Customer-এর browser-এর success response-এর উপর নির্ভর করা যাবে না।

Rule C

একটি Payment-এর একটি Unique Transaction ID থাকবে।

Rule D

Duplicate Payment হলে Duplicate Order তৈরি করা যাবে না।

Rule E

Payment সফল হলে Order Confirmation Automatically হবে।

Rule F

Payment Failed হলে Customer Retry করতে পারবে।

Rule G

Estimated Price এবং Actual Price আলাদা রাখতে হবে।

Rule H

Advance, Additional Payment এবং Refund আলাদা Financial Transaction হবে।

Rule I

Customer Payment এবং Agent Payment সম্পূর্ণ আলাদা Ledger হবে।

Rule J

Order/Payment/Financial Transaction সরাসরি Delete করা যাবে না। Correction-এর জন্য Adjustment/Reversal ব্যবহার করতে হবে।

30. Final Architecture

পুরো System-টি মূলত এইভাবে কাজ করবে:

CUSTOMER SIDE

Pre-Order Form → Advance Payment → Order Confirmation → Order Tracking

ADMIN SIDE

Confirmed Order → Agent Assignment → Purchase Monitoring → Delivery House → Shipment → Bangladesh → Customer Delivery

FINANCE SIDE

Customer Payment → Business Ledger

এবং

Business Payment → Agent Ledger

AGENT SIDE

Assigned Order → Purchase → Delivery House → Expense → Balance

এই চারটি Flow একে অপরের সাথে Connected থাকবে।
